ARITECH

Control Your Doors
CDC4-EN

Aritech is excited to introduce CDC4-EN, the new certified door control solution.
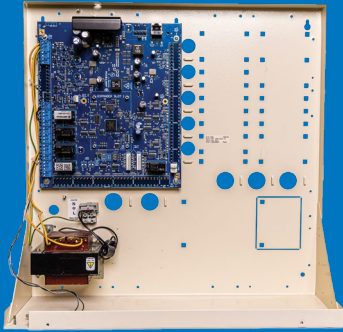

EN Certification: The CDC4 access control solution of Aritech now benefits from the EN-50131 certification. This major achievement makes CDC4-EN one of the very few access control devices that are certified for intrusion.

ATS1250 replacement for installation upgrade: what makes CDC4-EN a great solution for our customers is its size; it can replace the ATS1250 one-to-one with the same transformer and connections, which offers the perfect opportunity for a system upgrade and changing devices easily and in no time.

Retrofit and futureproof: CDC4-EN offers a perfect flexbility in time; the CDC4-EN has the advantages of the past with its four Wiegand interfaces, and the advantages of the future with the latest reader technologies such as OSDP encrypted devices.
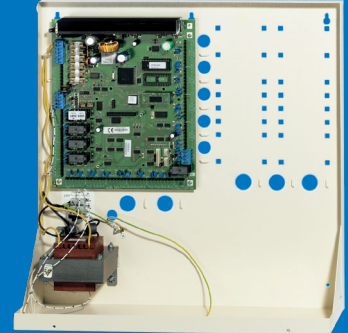

EUROPEAN NORM
EN

Choose CDC4-EN For Your Customers

High Security certified for intrusion

- Guarantee of an optimal security level to the European norm
- One of the first access control devices that is certified for intrusion
- Opens the door to more certifications, coming up

Flexibility in the past and future

- 4 Wiegand interfaces to allow CDC4-EN to connect to third-party readers as well as legacy devices; makes it retrofit and a good transition to upgrade installations
- OSDP readers compatible, providing an encrypted communication between the CDC4-EN and the readers

ATS1250 housing and MBC (discontinued)

Smooth transition to upgrade installations

- Unplug, replug to upgrade your system: the CDC4-EN has the same size, transformer and connections as ATS1250, which allows our loyal customers to change devices easily and in no time
- Save time at installation using the same tools for intrusion and access, with the same inputs and same wiring

CDC4-EN Installations

CDC4-EN is ideal for businesses demanding high security levels on the intrusion side, such as jewellery stores, banks and other sensitive premises.

Customers using ATS1250 are a good fit for CDC4-EN: this new product will be the opportunity for them to upgrade their access control system.

Features

- EN50131-3 & EN50131-6 approved
- 4 Wiegand interfaces for legacy and third-party readers
- Same features as CDC4
- Same size, transformer and connections as ATS1250
- Use inputs and power supply in EN50131 Grade 2 and 3
